To whom this may concern,

After continually battling with an outdated and unreliable computer system we requested a quote for a full server install and fit out for our offices in Bibra Lake from Command IT Services. During the fit out the service we received were of a very high standard. A lot of hours were put in by the team at Command IT Services who worked out of hours and on weekends to ensure that our down time was kept to a minimum. We also received assistance in relocating our offices including identifying and solving problems with our internet connection and telephone lines.

After the initial fit out we were impressed with the service that Bryan and his team provided and instructed the fit out of our second office site in Wangara. We were confident in the skills they possess that they could manage our systems effectively and have since relied on their support to troubleshoot problems and ensure that our systems function without any problems. After completion of our system upgrade we continue to have a working relationship with Bryan and Command IT Services and would not hesitate to recommend them to fellow businesses as a reliable, friendly and efficient IT Company.

If you have any further questions please contact me on the above number.

Best Regards

Aaron Schulz  
Director
